'I could Be Week'

In 2024 we ran an 'Aspirations week' where we invited parents and other members of our community into school to tell the children about their jobs.

It was hugely successful. The children learnt about how to be a radiographer, a prison dog handler, a neonatal nurse, a toy designer and an Olympic swimmer, to name but a few!

We are hoping to run similar sessions this term during type of week during week beginning 19th October.

This year, taking on board the children's feedback we would like to focus on 'making jobs'. We are looking at jobs/careers that involve the use of Design and Technology. In school this covers food preparation, textiles, designing and making including mechanisms and electronics.

It's obviously at 'first school level', the idea being that we share a variety of careers with the children to widen their knowledge of how their learning applies in the 'real world'.

We would be delighted to draw on your skills.

If you feel that you have knowledge to share in one of the following areas, please contact me via the office.

Designing and making of any sorts but specifically in the role of food preparation, textiles, mechanisms or electronics. For example:

Interior Designer, Design Engineer, Product Designer, CAD engineer, Video Game Design, Electrical Engineer, Civil Engineer, Sound Engineer, Mechanical Engineer, Architect, Robotics Engineer, Steel Fabricator, Aeronautical engineer, Electrician, Joiner, Surveyor, Chef, Seamstress, Carpenter etc.
